Status of Funds Reports

Overview

Status of Funds Reports display MARS summary/detail status of funds: budget allocation data and actual and pending obligations.

Data Sources

- Allocation Data is entered through the MARS Budget/CBS BOP process (or MARS AA process if Allotment Option is selected).
- The Actual Obligation data is downloaded from the CBS NDW_AP_TRANS file.
- Remaining Commitments for non-labor data are calculated based on the MARS commitments and CBS obligations matched to them based on the specific match criteria. Remaining Commitments for labor data are based on the outstanding MARS labor projections. Remaining Projection cost will display for all employees that have MARS projections created where the pay-period is greater than the current CBS indicated pay-period. When the month-end labor estimates are downloaded, this month projections will be subtracted from the projections pipeline. After reversal entry is in, Remaining Commitments will go back to the last recorded pay period.
- Encumbrance is an estimated amount based on the commitments entered.

- Report 25C allows LO extracting Cumulative Plan (Allotments, BOP and MARS plans), Obligations and Commitment data for reporting by month and quarter within MARS. This Report (as Reports 25O, 9C and 9O) captures Commitment data for a given time period to be used in Monthly/Quarterly Reports.

- Report 25C also displays CBS Prior Year Downward Adjustments, for information purposes.
- Report 25C allows users to add report subtitle and comments for printing purposes.
- Report has hyperlink from the Remaining Commitment column to the Monthly Detail Report (9C) for each object class row.
