## MARS Council Meeting Minutes

General Information		
<i>Date/Time:</i> Thursday, July 10, 2008, 2:00 pm − 4:30		
Location:	SSMC-3, Room 13836	

Attendees:

Tonya Coleman – NMFS

Mary Rieck – NWS

Maureen Pulver – NMFS

Mark Blades – NMFS

James Lewis – NESDIS

Dinara Holmes – OAR

Marina Rubina – NMFS/OCIO

Lisa Berry – NWS

Kathy Schulk – NMFS

Diana Smith - NOAA/OCIO

Rahul Dayal – NMFS/OCIO

Renee Galloway – NOS

Carmen Solis – NOS

Eugene Berger – OAR

Sylvia Scott – OAR

Gerald Thomas – NMAO

Peter Boyle – Program Support

## CCR Summary as of 7/8/08

Status	Count
Closed	37
Open	24
Hold	6
Work In Progress	14
Total	81

CCR	Description	Discussion	Comments	
Prom	Promoted to Production			
Data	Entry			
242	Remove repetition on Org Selection on Report Parameter pages (LO selection from the list for the Org Code parameter when FMC selection is also included).		Closed	
541	Update download procedure to accommodate changes in CBS PCARD Processing - update reconciled PCARD transaction with card info from original AP records based on the doc/item number.  Re-process of May and June PCARD Reconciliation records without card info (APC split line or cross LO records).		Closed	
562	Per Mark Eckman, Please add Ship Name to Labor e-mail notifications for 08-02-0001 (MOC).		Closed	

Repor	rting & Querying		
342	Under the Transaction Reports, in the MARS Documents		Closed
	by Doc-Item Type Report, two minor changes would be		
	helpful:		
	1. Could the Affected Reference Number be repeated at the		
	top of each page, and		
	2. Currently the title of the report on the first page overlaps		
	with the column headers when the report initially loads.		
	<b>Resolution</b> : 1. The 'Repeat break value on new page' option		
	has been set for MARS Aff Ref No and works fine in		
	Deski. The parm seems to be ignored when viewed in		
	Infoview. This is a bug that has been fixed in SP4. 2. Fixed		
	title as requested and also added selected Aff Ref No, Doc-		
	Item Types and FMCs to 'selected parameters' list in		
	heading.		

Work	In progress		
Data F	Entry		
82	The MARS Data Entry Financial Status Summary Report 25 requires you to pick a Line Office, but does not allow you to select all Line Offices. Program Support (and other LOs possibly) needs to run this report specifying a program (eg 06-01-02-004), but reporting obligations/BOP against that program in all Line Offices. Can you add that capability to select all Line Offices for Reports 25x (and other similar reports), so that Report 25 BOP/Oblig total for a prog (all LO's) matches Bus Obj NOA118 (LO-FMC) YTD LO-Detail tab which shows a total for a program/fund covering usage in all NOAA LOs?  Status: On going		In Progress. New multiple Options to the Report 27.
Repor	ting & Querying		l
66 & 141 Dups	Reporting and Querying / Business Objects SP4 Upgrade (Java 6 upgrade). This service pack, among other things, includes the change to the software to support Java 6.	Pack 4 upgrade (pack 3 plus additional functionality) will support Java 6 (except Safari browsers). Will improve PDF features, provide easier printing functionality (no need to specify printing range).	Development and pre-prod – completion by the end of the week (07/14). Production upgrade is scheduled for the end of July.  No CCR/changes production promotions before the SP4 upgrade (early August).
70	Based on a request from the Workforce Management Office, load data from source tables, and create universes and reports. The universes will support queries by WFMO as well as other users who might have previously obtained data from HRDS. Based on input from WFMO, recreate the highest priority reports that were in HRDS. HRDS is to be decommissioned by DOC on 3/15/08, and WFMO does not believe that the NFC reporting that will be		Waiting on WFO to provide access to additional tables to complete final reports.

	provided will satisfy all of NOAA's requirements.		
	Status: Waiting on WFO to provide access to additional		
	tables. Once we have access to these data sources we'll		
	be able to complete the final reports.		
72	Performance test all Business Objects reports in MARS.		
12			
	Fix any performance issues identified.		
	Status: As part of this effort the MARS Multi Year Trend		
	by Program report has been fixed and made available to		
	all LOs. It is under the Monthly Variance Reports		
	category. Reports that are based on selecting documents		
	with non-zero UDO and UEXP balances are being worked		
	on for performance.		
222	Federal Desktop Core Configuration (FDCC) controls	Per Eugene, created new	Can be closed.
	Status: Provided at meeting	test environment.	
Both			
69	Load data from a direct data source, build universes and		ITC staff working
	create reports from c.request/c.buy. This data will enable		with Doc on
	multiple analyses and will be able to be passed to the Data		connection setup.
	Entry Module for commitments.		1
	<b>Status:</b> Kick-off meeting 6/4, Follow-up 6/14. Defined		
	general architecture, process and tentative schedule.		
	Delivered ISA & MOA. ITC Tech staff working with		
	DOC staff after the 10 <sup>th</sup> to setup connection.		
71	Design and implement a method of automatically		
	updating the status of the data on the MARS web page.		
	Until this effort is completed, an up-to-date status depends		
	upon an individual manually updating daily.		
	Status: Data Status component of the MARS web page		
	promoted to production. Currently working on System		
	Status refresh.		
561	Setup an agreement with Grants On-line to acquire source		Follow-up meeting
	data to be used in MARS. Load data, build universes,		scheduled for 7/18.
	create reports and ingest Grants financial transactions into		
	the Data Entry Module as commitments.		
	Status: Kick-off meeting 6/5. Received general data		
	description from Grants On-Line PM, Chris Suzich.		
	Follow-up meeting scheduled for 7/18 to discuss technical		
	connection and data requirements.		
321	Cleaning OPT/Invalid out-year codes		
321	Status: New process and procedures planned roll-out 09		
	Status. INCW process and procedures planned fon-out 09

(24	This is in page of the Toward Date that	need to have Program- Project-Object Class drilling functionality. Need to include data not currently downloaded in NWS DW (GL accounts 6100s). This is a quarterly process (next time will be used for year-end process).	answer NOAA-related questions.
624	This is in regard to Travel Data between the Travel Authorization Universe in Business Objects and the Travel Commitments in the Data Entry module. Both systems use the NDW_RESERVE_TRAN table from CBS to populate. Currently between the two systems, the logic to populate the Fiscal Year is determined differently (this was verified with the MARS developers). Would it be possible to sync up the logic between the two systems? Since CBS does not have a fiscal year field on this table, logic must be used to create the value.	Data Entry side is using FCFY, and BOBJ is using TA_Trip_Date to determine Fiscal Year.	Needs to be discussed at the next O&M meeting.
Data E	ntry		
Demo	MARS Travel Number Feature	NMFS Demo of the Travel Numbering system that can be made available to other LO (needs initial customized set-up) if needed.	LO that want to use this feature will send e-mails to Gerald Stark.
501	Request change in Data Entry Module terminology of Division and Branch when used for grouping in a fashion other than using the CBS ACCS. CCR 341 and CCR 481 request Reporting & Querying to accommodate this feature in reports following the Data Entry groupings. Work on 341, 481 and 361 will be dependent on a change in terminology so that users of Reporting & Querying who do not use the feature in the Data Entry Module will not be confused. A couple of suggestions might be OPT Group and OPT Subgroup or OPTDIV and OPTBR.  Discussion – Need to define naming convention for both modules.		New name: OPT Group and Subgroup.
542	Develop download procedures to accommodate changes in CBS PCARD Processing - populate pcard transaction descriptions based on the new CBS Materialized view (to be created end of July).  Status: On hold until CBS process is in place (new materialized view to get notes for PCARD transactions - reconciliations).		
563	Change travel processing for FY 2009 to accommodate CBS Travel Changes (obligation of travel orders).  Status: In the process of estimating the changes.  Submited CBS help desk request to obtain sample of the obligation record to see what data will be available.		In progress. MARS Development trying to get info from CBS on what data from Travel Manager will be available on the AP_Trans obligation records.
584	NEW - As mentioned at the LO Admin meeting on June 26th, I request that when the MARS help desk/system admins receive an approved/complete new user access		It's going to be done by DBA group when a new account is

form and set up an account, that they also please grant the user's data entry access as it is checked on the user access form to the FMC/orgs, budget/commit/labor access etc  Then they can email the user that their account and access is ready. This would speed up and centralize account set up, to replace the current process of the help desk or user needing to contact and wait for the LO Admin to grant the access. Thank you.  604 NEW - Revisit and discuss creating method to download BOPs (other than BOPS designated as Target) into Budget Module to reduce double entry into both CBS and MARS. Actual methodology would need to be fleshed out. Some suggestions are that method would need to be optional, perhaps selecting BOP data from a list. User would need ability to potentially break BOP plan into multiple tasks, either by percentage or dollars.  564 NEW: In reviewing Data Entry Report #8 Budget Summary, which is supposed to show each MARS BOP transaction, it appears that some BOPs are being combined into one line/total because other fields are similar. Please add a field "MARS BOP and enable the report to show one line for each MARS BOP and enable the report to show one line for each MARS BOP and enable the report to show one line for each MARS BOP and enable the report to show one line for each MARS BOP and enable the report to show one line for each MARS BOP and enable the report to show one line for each MARS BOP and enable the report to show one line for each MARS BOP and enable the report to show one line for each MARS BOP and enable the report to show one line for each MARS BOP and enable the report to show one line for each MARS BOP and enable the report to show one line for each MARS BOP and be lined to show the marked of the ma
form to the FMC/orgs, budget/commit/labor access etc Then they can email the user that their account and access is ready. This would speed up and centralize account set up, to replace the current process of the help desk or user needing to contact and wait for the LO Admin to grant the access. 	Comments: Drop Supplemental Pay requirement, per			
	customer (Carem's) request, Also, waiting on WFM to			
	provide Retirement eligibility date.			
341	Would it be possible to add the "Division Filter" to the			
(see	User Prompt Inputs for the following report in the MARS			
501)	Reporting & Query module under "Transactions Reports":			
	MARS Four Digit Object Code (FMC-Org)			
441	Create a report showing comp time earned by person,			
	when it was earned, the rate at which it was earned, and			
	when it was earlied, the rate at which it was earlied, and when it expires. The data should be grouped by BUS			
	code. This report should be based on a spreadsheet			
	provided by Mary Berklund.			
481(see	Create a prompt for the NOAA 118 report for project code			
501)	and add a report tab that has monthly expenditures going			
301)				
60	across year-to-date to show the monthly actuals.			
00	The current Leave and Benefit Statement includes, as it's			
	title denotes, only information on the leave and benefits			
	surcharges and the over/under process related to them.			
	This request would add the other overheads to this report			
	so that one can better analyze O.C. 77 data.			
61	Extract GSA vehicle data, build a universe, and create			
	reports that show details about GSA vehicles by site. This			
	info would include such information as the type of			
	vehicle, the lease start date, the cost per month of the			
	lease, the miles driven and average miles, and the cost per			
	mile, with a monthly resolution.			
63	Recreate the Data Entry Module Reports within Business			
	Objects. This has been within the MARS scope from the			
	beginning.			
65	Provide a maintenance program that allows LOs to enter			
	their appropriation data that will appear on reports such as			
	the Financial Statement.			
67	Obtain a direct data source to load Sunflower data into the			
	MARS data warehouse in order to provide a universe and			
	reporting. This is within the original MARS scope.			
62	Create stored accounting reports. For some budget			
	analysts within NWS, the only reason they would use			
	Discoverer is to get the stored accounting data. They are			
	looking for a way to get this data within Business Objects,			
	thus only going to one source for their data needs.			
64	There are various maintenance tables that are maintained			
	by the Reporting and Querying software developers. In			
	order to give better control of these tables to the LOs,			
	develop a maintenance program allowing the LOs to			
	maintain the structures themselves. These include			
	Program Groups, Program Description Cleanup, Short			
	Name Maintenance, Doc-Item Type Description			
	Maintenance.

address FTE Reporting issues in MARS. be used depending on the type of CBS new processes in FY 2008 spread FTE back to info that reports track. the direst accounts (under 77 object class). Program-oriented reports will need Currently, MARS reports FTE excluding Internal to exclude Internal Fund and show FTE under Direct Accounts (same Fund showing hours spread to direct accounting. It can be confusing for users looking at FTE for HQ as dollars). FMCs. Variance Report will need to show A new approach could be to show FTE by FMC leave and overhead in the Internal (including Internal Fund, but excluding object 77 and Fund. Leave Project Types). The problem is also with reporting Budget FTE (planned under 11-12 for direct accounts and Internal Fund). Mark and Penny will need to further discuss the issue of FTE Reporting to come up with suggestions for Budget FTEs.

# Reporting FTE on 'MARS - Reporting and Querying' reports "Provided By Mark Blades"

**Discussion**: How should the FTE be reported in 'MARS – Reporting and Querying'?

#### **Issue:**

- Prior to FY 2008, FTE could be totaled by querying on all fund codes.
- In FY 2008, CBS spreads back the leave and internal fund (overhead) hours and FTE to the direct accounting. Uses object class 77 to record FTE.
- Due to the change, selecting all fund codes in the query would result in a double count of the leave and overhead FTE.
- This change will require a consensus on how FTE should be reported in MARS.

## **Current Reporting Approach**

• The reports show leave and overhead FTE using object class 77.

### **Approach Options for Reporting FTE**

- Approach 1
  - o Show Leave and Overhead "spread"
  - This approach would
    - exclude fund 02 (internal fund)
    - include object classes 11-6X and 77-XX
  - Current reporting approach
    - Spreads hours and FTE to direct accounting
    - Approach could potentially spread FTE out of HQ FMC's and be confusing to users looking for FTE by HQ FMC.

- Approach 2
  - o Show both leave and overhead in the internal fund
    - Include fund 02 (internal fund)
    - Exclude object class 77-XX
    - Approach will align the FTE by FMC (where the person works);
       however, the leave FTE is still stuck in the 09WLV project codes.
- Approach 3
  - o Show Leave spread and overhead in the internal fund
    - Exclude project type LVEXP (program 09-04-01-000)
    - Exclude object class 77-XX
    - Approach will show the FTE by FMC (where the person works) and also shows the leave spread.

#### **Decision Point**

- MARS Developers need a consensus, from LO's, on how to show FTE for current and future reporting.
- Will one approach work for all reports? Will it depend on the report?
- Do we need input from the Business Rules group (to include NOAA Budget)?

#### Other

- Should NOAA Overhead FTE be shown on reports (object class 77-87)
- How does this impact MARS Data Entry?

# 7/10/08 MARS Council Discussion re-cap

- Discussed the issue, current FTE reporting, 3 approach options for reporting FTE, and next steps at the 7/10/08 MARS Council meeting. Discussion followed the discussion paper (above) which was based on the 7/9/08 email from Penny Schmiedeberg.
- Much of the leave issue (09WLV) will be a mute point if NOAA elects to implement the leave and benefits proposal by NOAA CBS. 09WLV would no longer exist. Waiting on CFO Council approval.
- All agreed that 'approach 2' (show both leave and overhead in the internal fund) is not a viable option. The 09WLV needs to be spread.
- The MARS Council also discussed how there will be a need to see FTE based on an ORG code structure and Program structure.
  - Approach 1 (show leave and overhead spread) would tie more closely to reporting by program structure. This would align the dollars, hours, and FTE together. This would be useful to the LO Formulation staffs when building the FTE exhibits.

- Approach 3 (show leave spread and overhead in the internal fund) would tie more closely to reporting by Org Code. It would allow the LO's to identify the FTE in the FMC actually worked.
- As a result, the group has determined a need to see FTE reporting in a combination of approach 1 and 3 depending on the purpose of the report.
- The group recommends that for variance reporting purposes the FTE should be reported by ORG code. This is consistent with past FTE variance analysis.
- In addition, the Council recommends this issue be discussed in a Business Rules meeting. Many of the decisions will ultimately require NOAA Budget concurrence/guidance.
- All agreed the importance of making the same FTE reporting changes in MARS Data Entry.
- A member of the council asked a question about planning FTE on the BOP. How should we enter FTE on the BOP (for program code analysis, or combination of both)? Will we have to enter FTE in object class 77? Do we enter FTE on our internal fund program code?
- On a separate path, mentioned that Penny is working with NOAA CBS (Mike Boller) to validate the spread of leave and overhead hours and FTE in the over/under process.
